Professional Summary

Final-year Computer Science student with hands-on full-stack experience in MERN, Next.js, and FastAPI, having interned as SDE at Transpacks Technologies on real-time logistics dashboards and REST APIs. Skilled in WebSocket-based systems, JWT authentication, Docker containerization, and AWS cloud deployment, with applied AI experience using Gemini API, MediaPipe, LangChain, and Retrieval-Augmented Generation (RAG). Experienced in ML model training, data regression, and data mining. Solved **400+** LeetCode problems in C++, earned a 5-star HackerRank rating, and was a Finalist at Smart India Hackathon 2024.

Experience

Software Development Engineer Intern (SDE Intern)

Oct 2025 – Aug 2026

Transpacks Technologies Pvt. Ltd.

- Developed logistics and supply-chain features using **Next.js**, **FastAPI**, and **Strapi**, improving platform scalability to support **100+** concurrent users.
- Built real-time dashboards and REST APIs, reducing data lookup time by **30%**.
- Containerized services with **Docker** and deployed on **AWS**, streamlining environment setup and improving deployment consistency.
- Followed structured code reviews and CI/CD practices, reducing deployment issues by **20%**.
- Collaborated with cross-functional teams in an Agile environment across **2-week** sprint cycles, participating in sprint planning and daily standups.

Education

UIET, Kurukshetra (Jun 2022 – Jun 2026)

CGPA: **8.9/10**

B.Tech in Computer Science Engineering

Maharana Pratap Public School, Kurukshetra (2022)

Score: **94.2%**

Class 12 (CBSE)

Holy Child School, Kurukshetra (2020)

Score: **89.8%**

Class 10 (CBSE)

Technical Skills

Languages: C, C++, Python, Java **Frontend:** HTML, CSS, JavaScript, React.js, Next.js **Backend:** Node.js, Express.js, FastAPI, Strapi **Real-Time:** Socket.io, WebSockets **Databases:** MongoDB, MySQL **Authentication:** JWT, bcrypt, token-based auth **DevOps & Cloud:** Docker, AWS **AI/ML & GenAI:** LangChain, Retrieval-Augmented Generation (RAG), Gemini API, Vector Databases, ML Model Training, Data Regression, Data Mining **Tools:** Git, GitHub, Postman, JMeter

Projects

Real-Time Collaborative Code Editor

- Built a multi-user collaborative code editor using **React.js**, **Node.js**, **Express.js**, and **Socket.io**, enabling live code synchronization across **50+** simultaneous users via WebSockets with room-based session management.
- Integrated **Monaco Editor** (VS Code's engine) with support for **10+ programming languages** including JavaScript, Python, and C++.
- Deployed frontend on **Vercel** and backend on **Render** with real-time bi-directional event communication.

MakeFit – Fitness Web App

- Built a MERN-based fitness platform with JWT authentication and session management for **100+ active users**.
- Added BMI, calorie, and macro calculators, SVG muscle maps, and FitBot AI using **Gemini API**, increasing user engagement by **35%**.
- Optimized UI/UX with a responsive dark design, reducing bounce rate by **18%**.

Real-Time Weather App

- Integrated **OpenWeather API** to deliver accurate real-time weather data for **100+** global locations, including temperature, humidity, and forecasts.
- Deployed the app reaching **50+ users** with **99% uptime**; built a clean responsive UI with dynamic weather icons.

Achievements & Certifications

- Solved **400+** LeetCode problems ; 5-star C++ rating on HackerRank.
- Pursuing* – IBM (Coursera): **Generative AI Applications with RAG and LangChain**.
- Finalist – Smart India Hackathon 2024.
- Winner – Aawahan 2023 Coding Competition.
- Participant – Kavach 2023 Hackathon.
- Completed virtual software engineering experiences at JPMorgan Chase & Co. and Skyscanner.
